

The Heart & Hands of RenewSys!

Any organisation can be truly successful only when the people and the business grow hand in hand. RenewSys has grown exponentially in this past year, ramping up to make the most of its 750 MW Module line, 130 MW cell line, and 3 GW & 1.4 GW Backsheet and Encapsulant lines respectively.

This growth spurt has come with its own share of opportunities and challenges on the production floor, packaging, quality, dispatch and so much more.

From systems that need to be kept running around the clock to the efficient management of machinery, the team has been experiencing scenarios that had simply not come up before at smaller scales.

Amidst this the workforce has proven itself to be the heart of our operations, contributing to our growth, working side by side with our teams and making previously unachievable targets a reality.

Some of them have been with RenewSys right since our inception, and are committed to equipping themselves with skills to match the breakthroughs in the technology that we assimilate into our lines.

We thank all our dedicated workmen and women who power RenewSys & we will work together for the success of solar in India.

Snippets From Around The Globe

Team RenewSys has visited and participated in 11 exhibitions across 8 countries in the past few months including India, Brazil, Mexico, Kenya, Nigeria, etc. These were full of exciting experiences and learning, as we made contact with so many organisations and individuals whom we had not met with before.

We invite friends and partners to join us at the Solar Show Africa, Johannesburg, booth no: B13 on March 31-April 1, 2020 & the Solar Show MENA, Cairo, booth no: B6a on April 13-14, 2020.

RenewSys hosted techno-commercial customer meets in 6 cities, giving attendees a chance to familiarise themselves with the developments in the PV industry one on one.

Speaking to the Industry

Sandeep Devabhaktuni, RenewSys, shares his insights on the 'Developments in Solar' at the National Power Summit, Hyderabad, Telangana.

Bhupendra Singh Rawat, RenewSys, was part of an international panel at the '1st Empowering Women in CleanTech Summit' sharing insights rooted in his diverse experience in the solar power sector at the REI Expo 2019.

Rooftop installations are making solar power accessible to organisations and homes across India. Raja Iyer, RenewSys, shared insights on how rooftops can lead the charge in India's solar revolution at the SolarGenX, Bengaluru Edition.

Ashish Kumar Singh, RenewSys, shares his insights on new Encapsulants and Backsheets, specially made for 'Floating Solar' at The World of Innovations, REI Expo 2019.

RenewSys Wins!

Chapter Convention Quality Circle Awards 2019

Gold Category Award for 'Addressing High Silicone Sealant Consumption During Module Framing'

Gold Category Award for 'Salvaging Residual Cut Pieces of Photovoltaic Cells'

Gold Category Award for 'Addressing High Energy Consumption in Module Line Utilities'

SuryaCon Gujarat State Annual Awards 2019

'Outstanding Achievement in Solar Sector' Award

High Reliability PV Backsheet Tech Seminar

'Most Promising Integrated Manufacturer of PV Modules and Components'
