

RenewSys Signs 370 MW EPE Encapsulant Supply Deal with Pahal Solar

Ahmedabad, India, August 2025: RenewSys, India's leading manufacturer of solar PV key components, today announced it has signed a significant supply agreement with **Pahal Solar**, a foremost AI-powered solar module manufacturer based in Gujarat. Under this agreement, RenewSys will supply **370 MW** of **high-performance EPE** (Ethylene Propylene Elastomer) Encapsulants to Pahal Solar over a **five-month period** from September 2025 through January 2026.

This partnership reinforces RenewSys's commitment to supporting India's growing solar manufacturing ecosystem with advanced materials that enhance module reliability and efficiency. Through collaboration with Pahal Solar, RenewSys aims to enable the production of high-quality, domestically made solar modules that contribute to India's renewable energy goals and the "**Make in India**" initiative.

"Our premium EPE encapsulants are widely regarded as the best in the industry, trusted by leading companies for their superior durability and performance. This substantial order reaffirms the confidence that key players like Pahal Solar place in RenewSys products. Together, we are not only powering India's clean energy revolution but also exemplifying the strength and reliability of indigenous manufacturing." said **Mr. Avinash Hiranandani**, Vice Chairman and Managing Director at RenewSys

Mr. Manish Shingala, Director of Pahal Solar, added, *"At Pahal Solar, our alliance with RenewSys emphasizes shared values in quality, innovation, and the vision for a sustainable future. This supply agreement is integral to our mission of delivering robust, high-efficiency solar solutions that drive energy transformation across India."*

RenewSys continues to lead the development and supply of encapsulants, backsheets, and PV cells that play a critical role in the solar value chain, supporting the MNRE and ALMM's target of expanding renewable energy capacity while fostering local manufacturing excellence.

About Pahal Solar

Pahal Solar is a pioneering solar module manufacturer and EPC solutions provider headquartered in Gujarat, operating a fully automated 2 GW capacity plant with AI-powered quality assurance to serve diverse clients across residential, commercial, and industrial segments in India.
